

Winter Planning

PRACTICE PLUS CAN OFFER REGIONALLY TAILORED SERVICES AND BESPOKE PACKAGES SPECIFICALLY DESIGNED TO SUPPORT PRACTICES DURING THE WINTER SEASON

Practice Locum and Clinical Support Services
We offer two dedicated practice services;

- **inbox management** and
- **dedicated telehealth locums - many practices are using this for managing acute demand**

Each arrangement is tailored to the practices needs. The clinician is set up with access to the practices PMS and completes consultations for their patients.

Patient co-payments and funding are directed back to the practice.

**WE HAVE CAPACITY FOR SAME DAY APPOINTMENTS FOR YOUR PATIENTS
9AM-10PM WEEKDAYS AND 8AM-8PM WEEKENDS AND PUBLIC HOLIDAYS**

Practice Plus regular service is available to any patients, including Casuals or Unenrolled, with enrolment support provided if required.

Solutions to suit

- **Vouchers**

Vouchers may be purchased by a Practice or Region, to offer No-Cost or Subsidised Consults eg under 14 funded consults Practices/Regions can choose how and who they provide vouchers to, be that handed over the phone after Nurse Triage, or messaged to high priority patients in preparation for Winter to keep them out of ED. Practices can opt to use vouchers, and add patient fees into their own Patient Management System to increase access for patients on payment plans.

- **Dedicated Clinics**

Regions can arrange dedicated clinics that patients only within their region can access, for example a winter After School Clinic. Patients can be directed to the dedicated clinic that they can book online with dedicated GP resource.

- **Digital Corridor for Urgent Care and Emergency Departments**

Practice Plus can create partnerships with EDs and Urgent Care Clinics to create a 'Digital Corridor' to Primary Care Telehealth. Many presentations are suitable for Primary Care, and Patients can be booked on site to have a hosted consult, or be sent home for their Episodic Urgent Primary Care
